

DESIGN

Below is a webpage without any real design or development consideration. The goal is to transform this page by replacing this code with components from our Patternfly-Next React Library and answer the design questions.

1. Currently, the cards are positioned to the left. How can you make the cards position to the center?
2. The navigation links aren't styled well. Suggest three ways that you could add styles to make them accessible for users.
3. List the color combinations on the page that would raise accessibility concerns.
4. Once you get the application running, change the window size. Did you see the logo change size? What could be causing this?
5. Drag the window all the way to the left. Name three problems with this webpage on a mobile device.
6. What other design suggestions could you come up with? Take a look at patternfly.org to see what components might help this page because more usable and consistent.
